**Filtrete™ Water Station from 3M
FACT SHEET**

Description:

The Filtrete Water Station from 3M provides the convenience of bottled water without the cost or waste. Unlike traditional filters that are slow and require separate bottles or glasses, the station filters water directly from the tap into four, reusable water bottles. In seconds, the water station helps reduce sediment and chlorine taste and odor from tap water.

Product Features:

- Helps reduce up to 3,000 plastic water bottles worth of waste from landfills per year
- Filter lasts longer, filtering two and a half times more water than traditional pitcher filters (up to 100 gallons or for approximately three months)
- Includes a three-month filter change indicator that shows when it's time to change the filter
- Reduces sediment and chlorine taste and odor from tap water
- Filter housing is recyclable with #2 plastics (check with your local recycler)
- Includes four, 16.9 ounce bottles that are dishwasher safe, BPA-free and include a leak-proof cap
- NEW Filtrete Water Bottles with screw-top lids are available in an assortment of colors for personalization and color coordination — Lime, Citrus, Punch Frost and White

Retail Availability:

The Filtrete Water Station is available at mass merchandisers as well as online.

Suggested Retail Price:

Filtrete Water Station (1 Docking Station & Lid, 1 Filtrete Fast Flow Water Filter, 4 - 16.9 oz (500mL) Water Bottles): \$42.99

NEW Filtrete Water Bottles with colored screw-top lids:
(2 - 16.9 oz (500mL) Water Bottles): \$15.99

Filtrete Fast Flow Water Filter: \$12.99

For more information, visit www.FiltreteWaterStation.com to register for the automatic filter change reminders through Clear Advantages.
